- 2.1 Measure weight, using common standard units for example grammes, kilogrammes.
- 2.2 Estimate weights.
- 2.3 Compare weights, for example more than a kilogram, less than a kilogram.
- 2.4 Read simple scales for weight to the nearest labelled division.
- 2.5 Choose and use appropriate units and measuring instruments.

Which is heavier... 2kg or 3000g?

There are 6 bags of feed. Each animal needs a bag taking to their enclosure. You will need to estimate the weight of each bag to work out which bag belongs where. Use the example bag which weighs 5kg, to help you estimate the others.

I estimate the weight to be:

The actual weight is:

Problem Solving

Can you solve the clues to work out which feed bag belongs with the correct animals?
Use the actual weights of the feed bags and read the clues below. Decide which bag belongs with each animal and write the letter on the bag next to their name.

Write the bag letter here

Alpacas:

We have the second heaviest bag of feed.

Ducks

Our bag of feed weighs more than the tortoises but less than the rabbits

Pigs

Our bag is the heaviest of them all.

Tortoises

We have the second lightest bag of feed.

Rabbits

Our feed bag weighs half the amount of the Pigs bag

Guinea Pigs

Our feed bag is the lightests of them all

Teacher Notes:

Maths (Entry 1&2) Estimating Weight

Example bag to weigh 5kg

A: 2kg

B: 7kg

C: 1kg

D: 4kg

E: 10kg

F: 5kg

Clues

A: Tortoises

B: Alpacas

C: Guinea Pigs

D: Ducks

E: Pigs

F: Rabbits
